

Support ticket classification map

Twelve months of support tickets, sorted into four problem families. This is the structure the WhatsApp assistant routes on.

Built directly from the “Call Ticket Type” and “Email Ticket Type” sheets shared by the support team. Duplicates across both sheets (e.g., Power Adaptor, Lead Cable, Mac600↔V-Cardia Swapping) have been merged into single branches. Layer 1 = Top Problem Category | Layer 2 = Sub-group | Layer 3 = Specific ticket type

1. Hardware Issues

- Device / Machine Issues
 - Mac600 issue
 - V-Cardia machine issue / replacement
 - Mac600 to V-Cardia swapping (incl. temporary/international demo swapping)
 - TR-100 (WiFi) issue
 - TR-100 (GSM) issue
 - TR-200 issue
 - Machine water-clogging damage
 - Wrongly mapped device/machine
- Cables & Connectors
 - Lead cable issue / damage (incl. V-Cardia lead cable, serial port)
 - Limb lead / chest lead reversal
 - OTG cable issue
 - Ethernet/USB cable (TR-200)
 - Connector / serial / charging pin issue
 - Power chord/cable issue
- Power Related
 - Power adaptor issue / damage / full set missing
 - Battery issue (incl. Mac battery pin)
 - UPS issue
- Peripherals & Accessories
 - Keypad issue (incl. V-Cardia keypad)
 - Display issue
 - Printer issue / printer roller missing
 - Tablet issue
 - Phone issue / phone stolen
 - Mobile compatibility issue
 - Bulbs / clamps issue
 - Sim card tray issue
 - Motherboard issue

- Hard/software reset button issue
- Acquisition & Network Hardware
 - Acquisition delay – network issue
 - Acquisition delay – WiFi issue
 - Network – SIM card issue
 - Echo data upload issue
- Quality & Calibration
 - Poor quality / repeat ECG
 - Calibration certificate request
 - V-Cardia logs request
- Equipment Handling
 - Spare inventory request
 - Equipment stolen / misplaced
 - Inventory return (field)
 - General service request (hardware)

2. Software Issues

- App Issues
 - App issue (general)
 - V-Cardia app issue
 - Trilink issue
- Portal & Platform Access
 - Customer portal issue
 - Cardionet access issue
 - Hubbr credentials issue
 - Credential creation request
- Integration & Backend
 - API integration issue / API error
 - Server issue – internal
 - Service provider issue / internal downtime / post-release glitch
 - Delay in reporting due to downtime
- Data & Case Management
 - Data update (ECG/ECHO)
 - Case clone request / issue
 - Close clone – age issue
 - Product enhancement / data request

3. Report-Related Issues

- Report Not Received / Delayed
 - Report not received (mail/SMS/app)
 - Urgent report request (ECG)

- Urgent report request (ECHO)
- Delayed reporting by medical team
- Report Content & Diagnosis
 - ECG – clarification of report diagnosis
 - ECHO – clarification of report diagnosis
 - General report-related query (ECG/ECHO)
 - Doctor signature/qualification request
- Report Process
 - Skip ECHO case
 - Digitization request

4. Account, Billing & Non-Tech Requests

- Billing & Payments
 - Billing query / ECG billing clarity
 - Monthly invoice request
 - Payment collection / remittance
 - Change in billing plan
 - Billing name change
 - TDS certificate request
 - Vendor KYC verification
 - Purchase order
- Account & Contract Management
 - Activation / deactivation request
 - Temporary suspension
 - New contract request / expansion order
 - Change of customer/company name, address, or billing
 - Request for ownership transfer
 - Prepaid recharge request
 - Plan change request
 - Churn pickup
 - Spoke change request
 - NPA / account status query
- Training, Demos & Camps
 - Onsite / remote training request
 - Product training request
 - Demo request
 - Camp request
- Contact & Data Management
 - Add / remove contact
 - General data update request

- Documentation Requests
 - Tricog document request
 - Logo request
- Consumables
 - Gel bottle request
 - ECG paper request
- Feedback & Escalation
 - Overall / service feedback
 - Critical call concerns (IVR/manual)
- Miscellaneous Admin
 - HR query
 - Sales / business enquiry
 - New process update
 - Disconnected call follow-up

5. Non-Relevant / Not Applicable

- Missed call
- Promotional call
- Duplicate ticket
- Junk / junk mail

Notes on consolidation

- Merged near-identical entries with inconsistent spelling/casing (e.g., “Mobile Compatibility Issue” vs “Mobile Compatibly Issue”, “Power Adaptor” vs “Power Adapter”).
- Kept the team’s original Tech/Non-Tech/Hardware/Software/Report Related/Non-Relevant tagging as the basis for top-level categories, since that’s what your team already reports against — this should make it easy to map back to your existing ticket system.
- A few report-related tickets were tagged “Non-Tech” in the raw sheet (e.g., “Report Not Received”, “Urgent Report Request”) but are grouped here under Report-Related since that’s how customers would describe the problem when calling in.
